

Could I Have Hepatitis?

The word "Hepatitis" means liver inflammation. Three common viral hepatitis strains in the United States are Hepatitis A, B, and C. Symptoms are flu-like: nausea, abdominal pain, and sometimes jaundice. The only way to know is to GET TESTED! Millions of Americans have hepatitis and don't know it. The Cerro Gordo County Department of Public Health offers hepatitis testing for Cerro Gordo County residents. Call Public Health: 421-9323 or Toll Free: 1-888-264-2581.
